REASONS FOR ALLOWANCE

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance:

The present invention pertains to a method of testing a multi-port memory.

The claimed invention recites in both independent claims, features such as "...conducting the first and second memory operations in a folded sequence upon one of the memory cells during the same test clock cycle of the test element, ... (in such a manner)... to ensure that the second time period overlaps the first time period such that the first and second memory operations are completed within the same test clock cycle of the test element."

The prior arts of record teach various methods of testing multi-port memories and various clocking features, however none of the prior arts of record teach the claimed specifics of the present invention. As such, modification of the prior art of record can only be motivated by hindsight reasoning, or by changing the intended use and function of the prior art themselves. Therefore, it is not clear that one of ordinary skill in the art at the time of the invention would have made the necessary modifications to the prior art of record to encompass the limitations set forth in the present application. Moreover, none of the prior arts of record, taken either alone or in combination, anticipate nor render obvious the claimed inventions. Hence, claims 1-8 are allowable over the prior arts of record.
